

PT-8000 The Epitome of Versatility!

Ingenious is the only word that describes the Brother P-Touch XL Professional Labeling System.

There's never been anything like it! This unique system opens up creative possibilities that were considered impossible with comparable machines.

It has more fonts, more characters, more sizes and more symbols built into it than any other system. In addition, it features a familiar full-size typewriter keyboard and a two-line 24-character LCD display, so it's also remarkably easy to use.

Another breakthrough is its size. Smaller and lighter, it brings a whole new meaning to portability.

And because it operates on included AC adaptor or optional Ni-Cd battery, you have unlimited freedom to take it, and use it, anywhere.

If you want professional labels, in virtually any size, any color and for any application, you want the advanced Brother P-Touch XL.
