LAN ProNavigator™ Network Data and Coaxial Cable Tester

If you're a technician on the go, you need the LAN ProNavigator™ from Paladin Tools! Two-piece tester includes main unit and remote with test results at both ends. The LAN ProNavigator™ features:

- ✓ Quick fault analysis on coax & data cables
- ✓ CAT-5 or CAT-6 (UTP/STP) cable testing
- ✓ One-button, simple testing (PASS/FAIL or fault find)
- ✓ Detects Opens, Shorts, Crossed Wires & Split Pair
- ✓ Traces wires with tone & remote lights
- ✓ Compact & lightweight, comfortable to hold
- ✓ Designed & manufactured in the USA
- ✓ Test status at both ends (main unit & remote)

LAN ProNavigator Specifications:

- ◆ Tests data and telephone cables up to 320 feet (100 meters) for proper pairing for EIA/TIA-568A, EIA/TIA-568B, Token Ring, 10 Base T, and common Category 5 configurations. ◆ Tests unshielded UTP and shielded STP data cable. ◆ Detects good connections, open connections, crossed wires and split pairs. ◆ Tests common BNC connected 50 and 75 ohm coaxial cables up to 320 feet (100 meters) for continuity. ◆ Tests cable types RG58, RG59, RG6, Belden 8281, RG8, RG11 and more. ◆ Provides oscillating audio tone generation for use with tone probes to locate cables. ◆ Shows test results at both ends of cable. ◆ Belt clips provided and lanyard holes embedded in case to attach to belt or wrist. ◆ Uses standard 9-volt dc battery with auto-off function to preserve battery life. ◆ Simple PASS/FAIL test results in one second allows technicians to quickly move on to the next test site.
