

Think your DSP is still good enough to test fiber?

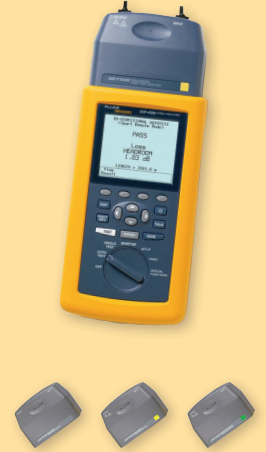

Think again. As the industry evolves, standards advance, and service and support become unavailable for discontinued testers, the DSP Cable Tester has exhausted its time as an effective fiber tester. Take this opportunity to **get cash for your obsolete tester and upgrade to the DTX CableAnalyzer**, which supports the latest fiber standards, offers revolutionary efficiency, and advanced fiber OTDR capabilities – not to mention top-notch service and support from Fluke Networks for years to come.

How it works

1. Purchase an eligible DTX CableAnalyzer Fiber Kit or a set of MFM2, SFM2, or GFM2 modules between January 17 and June 30, 2010.
2. Send Fluke Networks the following items:
 - This form, completed
 - W-9 form, completed
 - Copy of invoice showing DTX or xFM2 purchase date
 - Your retired DSP Cable Analyzer and/or FTA modules
3. Fluke Networks will send you a rebate check for up to \$3,000 based on the item you purchased/traded-in

NOTE: To receive the maximum rebate, you must purchase your DTX and/or xFM2s before March 31, 2010 and send all required items to Fluke Networks by April 15, 2010 (see matrix below).
