

Purchase the Fiber Test Set you need and we'll send you a Fiber Optic Cleaning Kit for free!

See how Fluke Networks' Fiber OneShot™ Optical Test Set brings essential simplicity for traditionally complex single-mode fiber testing. Designed with intuitive one-button test capability you are able to quickly and accurately verify if a fiber is active; find a break, end, dirty end face/bulkhead or reflective event from zero to 6,000 meters with no dead zone. Whether you are testing at the central office, node, hub, ONT (optical network terminal), residence or business; the Fiber OneShot is an FTtx tester designed to increase productivity. No matter where you are in the network, the Fiber OneShot is so affordable, lightweight, fast, accurate and essential, that you really shouldn't leave home without it.

From January 1, 2010 through April 30, 2010, when you purchase either one of the Fiber OneShot Optical Test Set eligible part numbers, you will receive a fiber optic cleaning kit for free:

Fiber OneShot Optical Test Set

Essential fiber testing made easy with 1-button...accurate, fast and lightweight

Triple-Check for essential troubleshooting:

1. Light or No light, is my fiber active? CheckActive™ alert
2. Distance to event (fault): Dirty end face/bulkhead and break or reflective event
3. Distance to event (end): End of fiber

Testing benefits that increase your productivity:

- Measure the length to a break, end, dirty end face/bulkhead, or reflective event quickly and accurately from 0 – 9,999 feet (note* 0 – 6,000 meters displayed in metric mode)
- CheckActive alerts the user if an optical signal is on the fiber
- Instant-On, (No boot/load time)
- Single button testing: essential fiber testing in just a few seconds
- No dead zone, locate fiber faults at 1-meter & adjustable feet/metric mode
